

Butirex C4 help to control the growth of *Salmonella enteritidis* in fattening pigs

Spain, 2017
PREM13-POR-FAT-8

Butirex C4 help to control the growth of *Salmonella enteritidis* in fattening pigs

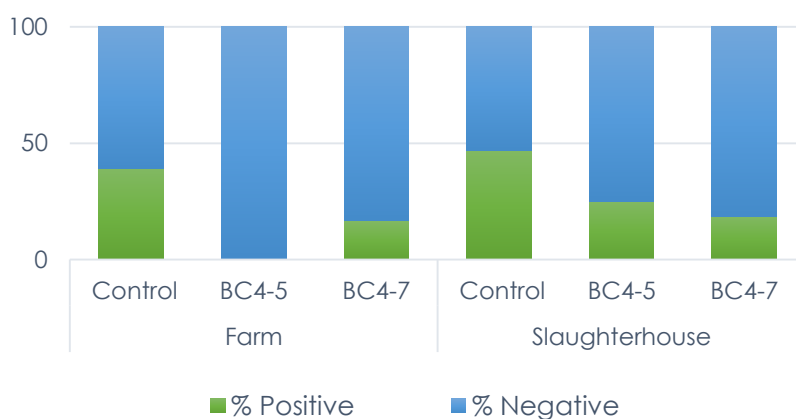

The aim of this study was to measure the effect of BUTIREX C4 against *Salmonella enteritidis* in vivo in fattening pigs. Basanta, A., Ortiz, A., López, A., and Carrasco, C. (Proyect CDTI IDI-20151263; Zaragoza 2017)

- *Salmonella* ELISA antibody titre:
 - in farm (32 blood samples/tto)
 - in the slaughterhouse (72 by tto)

| Treatments | Butirex C4 |
|------------|------------|
| Control | - |
| BUT-5 | 5 kg/t |
| BUT-7 | 7 kg/t |

Prevalence of *Salmonella* (% ELISA positives blood samples) in the farm and the slaughterhouse P=0.037

Inclusion of Butirex C4 reduces *Salmonella* prevalence in faeces and blood serum before and after slaughtering of fattening pigs
